

The nubedian GmbH in Karlsruhe is looking for an intern in the field of research and development of web and mobile healthcare applications

Nubedian GmbH is an award-winning software and service company offering various software solutions for social and health care. Since in its early stages nubedian GmbH has remained connected to research - always with the aim of supporting healthcare processes and research in new information technologies.

This work should support the medical staff and patients related to documentation and communication by web and mobile applications. The software accompanies processes, forces networking and facilitates an efficient and transparent documentation. The modular assembling of the software enables an easy adaption to several applications in social and healthcare economy. The trainee will contribute to adapt the software to other areas of application in social and health economy.

Tasks

- Analysis of the work processes and existing documentation tools
- Creation of a specification to define the requirements that the solution has to fulfill
- Conception of mockups and architecture
- Development of web and mobile tools for documentation connected to a hospital information system
- Continuous integration
- Test and evaluation
- Work in an agile team

Requirements

- English or German: Independent User B1
- Field of Study: Engineering and/or Technology, Mathematics and/or Informatics
- Skills: Java, JavaScript or C#

Our Offer

- Agile environment with streamlined process flows and quick decisions
- An interdisciplinary environment with partners from science, industry and users
- Friendly working atmosphere with a young and dynamic team
- A modern workplace in a growing company
- Space for your own ideas
- A fun environment with a video game console and a great terrace with barbecue.
- Monthly team event
- Salary

We look forward to meeting you!
